SPRING INTO WINTER

CLIMATE CHANGE is a genuine concern for our community and for our general way of life. Imagine a near dystopian future through the sculptures of community artist Nichola Clarke.

Nichola, along with artist and curator Hannah French have worked with our community to explore the effect that climate change is having on our crops and a potential future of genetically modified or drought resistant plants.

COME, HELP, CREATE: Community art workshops Tuesdays and Thursdays in May 7-9pm at the Center for Participation. During the festival learn how to make your own solar garden - Your art will be displayed at the showgrounds for the Winter Warmer.

Join us for nibbles and a drink to celebrate Spring into Winter at the Celebration and Launch Monday 4 June 4pm at the Exchange Hotel.

THE ART IS...FESTIVAL loves to explore and tell stories, your stories, crafted by the footprints we make as we live in the Wimmera. This year Art is... festival is creating - moulding our future. Exploring who we are, where we are from and where we are going. As we shape and mould our lives we discover who we can become. Whilst we shape and mould our lives we learn about who we are as self, about our environment and the consequences of change.

Join us in 'Moulding our future' making small changes in order to be who you want to be and allowing our children the opportunity to shape and mould their future in our changing global environment.
